Volunteering

WebWeavers, MIET | Frontend Developer

June 2024 - Oct 2024

- Enhanced overall web application performance by 20% through optimized responsive design and clean, maintainable code, while streamlining the development workflow to reduce delivery time by 25%.

Internship

Codsoft | Fullstack Developer Intern (MERN) (Remote)

June 2024 - July 2024

- Developed and deployed MERN apps, improving performance and scalability while delivering responsive, user-friendly features.

Projects

WorkLink | *Next.js, MongoDB, Typescript, Tailwind CSS*

- WorkLink is a unified platform where users can find traditional jobs and freelance opportunities. It allows users to post jobs or freelance tasks, enabling them to act as both client and freelancer.

Vox | *Next.js, LlamaIndex, Mangodb, Pythan, Typescript*

- An AI-powered web app that lets users analyze their data (CSV or databases) by asking questions in plain English. It generates tables, charts, and insights instantly, making data analysis simple and accessible.

Sotrian | *Nextjs, pythan, LangGraph, Scikit-Learn*

- Sotrian is an AI-powered, full-stack platform (Next.js/Python) utilizing specialized ML models for multi-modal fraud detection (credit card, UPI, phishing, etc.) and an AI Chat Assistant for real-time risk advisory.

Zella | *Langchain, Python*

- Zella is an AI-powered chatbot that can read, explain, and send emails automatically based on your input. It also acts as a smart conversational assistant, handling queries and generating responses with ease.

Skills

- Languages:** HTML5, CSS3, JavaScript(ES6+), TypeScript, Python
- Framework:** React.js, Next.js, Tailwind CSS, Langchain, Scikit-learn
- Database:** Mongo DB, PostgreSQL
- Developer Tools:** Git, Github, Docker, Postman, Power BI

Licenses & Certifications

- HackerRank SQL (Basic)
- HackerRank Python (Basic)
- MongoDB Certification (Atlas, CRUD, Aggregation, Indexing, Transactions)
